LEAD MANAGEMENT TRAINING COURSES

OSHA Lead Training (8 hour)

A one-day course provides a thorough review of the OSHA Lead in Construction Standard (29 CFR 1926.62), employee protection, and how to develop the mandatory written compliance program.

Operations & Maintenance Course (8 hour)

Training for maintenance workers to reduce exposure to lead while maintaining and managing lead-based paint in place. This course is important because routine building maintenance and repainting activities can disturb lead-based paint and create hazards. The theme of the course, "Work smart, work wet, work clean to work lead safe!" reflects its goal to prevent exposure to lead dust hazards for school children, residents, workers, and workers' families during and after routine maintenance, repainting, and repair projects. The class is practical, interactive and hands-on. It was developed by the National Environmental Training Association under a grant from EPA and HUD.

On-Site Training Courses

PBS offers on-site versions of all its Lead and Asbestos training courses. This is a cost-effective way of providing training to a large number of individuals from the same firm. On-site training can be customized to fit your organization's unique training requirements and scheduled at your convenience

ASBESTOS MANAGEMENT TRAINING COURSES

AHERA / ASHARA Inspector Course

The Inspector course teaches students to locate and assess asbestos-containing materials in buildings and presents intricate detail on how to survey and take samples. The course culminates with a mock survey field trip. EPA-approved.

AHERA / ASHARA Management Planner Course

A two-day course required for individuals who modify or update a school district's management plan response actions. The three-day AHERA / ASHARA Inspector Course is a prerequisite. EPA approved.

AHERA / ASHARA Project Designer

A three-day course that covers the components of asbestos response actions and their selection. It will address appropriate abatement methods, state-of-the-art technology, safety and cost factors. Written project designs and visual inspections are discussed in detail. EPA approved.

Asbestos Refresher Courses

Oregon Full-Scale Worker
Oregon Supervisor
Inspector/Management Planner
Project Designer

OSHA Operations & Maintenance Course

Two-day required course (OR-OSHA 1910.1001) designed for operations and maintenance personnel, plumbers, electricians, remodelers, and workers performing minor asbestos repair or maintenance work.

HAZARDOUS MATERIALS TRAINING COURSES

Emergency Response Team (ERT) Training

Designed specifically for industrial operations, these courses stress various levels of OSHA-required training including Hazardous Materials Awareness Level (4 hrs), Incident Command (4-8 hrs), Operations (8 hrs) and Technician (24 hrs). Annual Refresher (8 hrs) Training also provided.

HAZWOPER Training

Initial certification for hazardous waste sites and hazardous chemicals and/or processes. Personal Protective Equipment and hands-on tasks used in hazardous materials identification for spills and release emergencies. (40 hrs.) Annual Refresher (8 hrs) Training also provided.

PCBs / Mercury Training

This two-hour class teaches participants how to inspect buildings and facilities for PCBs and PCB spills associated with fluorescent light fixtures and for mercury-containing fluorescent lamp tubes. It also provides an overview of PCB and mercury health effects, environmental laws, and cleanup and disposal regulations. A four-hour version of the class provides hands-on training in PCB cleanup practices, safe handling techniques, personal protection equipment (PPE), disposal manifesting, and other crucial skills. Both training classes comply with EPA regulations in 40 CFR 761 and OSHA regulations in 29 CFR 1910.
